## 1. INTRODUCTION

This report deals with 111,646 pupil retirements from 511 publicly-supported secondary schools of Ontario during the period from October 1, 1965 to September 30, 1966, and is comparable to a report for 1964-65 which was published in May, 1966. The term 'retirement' refers to a student who has completed his course as well as to a student who left before completion. In other words this report includes pupils who have left the Ontario Secondary School System for various reasons. 'Transfers' from one publicly-supported school to another are excluded from the report since they have not withdrawn from the school system.

As in the previous year, the scholastic data include the grade, Branch and Program and the Certificate or Diploma. Personal data include sex and age. The reasons for retirement or the students' immediate plans have been explored. Pupil retirements from private schools are not included. The definitions of terms used in the collection, processing and the presentation of these data as well as definitions of Certificates and Diplomas, a copy of the Pupil Retirement form, and the instructions for completion of the form may be found in Appendices I, II and III.

The report consists of six sections; the first section is introductory and the second deals with the facts and figures of Pupil Retirement during the year 1965-66.

In the second section selected figures are reproduced from the Pupil Retirement Tables for 1965-66 and graphic presentation of percentage distributions made. Pupil Retirement Tables for the year 1965-66 form the third section. Since 1965-66 is the second year of the study it is possible to compare the figures with those of the previous year. The fourth section contains certain key figures of pupil retirement for the two years which are presented in a manner convenient for comparison. Tables consisting of detailed comparative statistics for the two years and the Appendices make up the fifth and sixth sections of this report.

In this, the second report of a continuing study, we offer little in the way of interpretation or explanation. Instead, we have presented the data in the form of tables with added diagrams which serve as visual aids. These will enable the reader to arrive at his own conclusions.

It is encouraging that Nova Scotia and New Brunswick are undertaking similar studies with the assistance of the Education Division of the Dominion Bureau of Statistics, Ottawa.

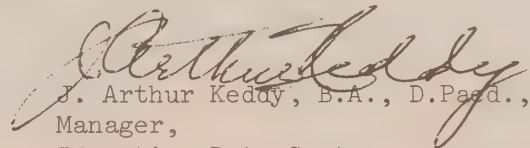

We are already well into the planning of the production of the next report. The enthusiasm shown by the users of the first report has been very encouraging and the various suggestions received from them have been incorporated in this study in one

form or another. The tabulations in Section 3 are more extensive than those in the 1964-65 report. Similar tabulations will be made for Schools and School Boards, and for each of the ten Education Regions in Ontario.

In conclusion we would like to express our appreciation to the following people for their co-operation and efforts without which the compilation and publication of this report would have been impossible:

Principals of Secondary Schools and their secretaries and staff,  
Regional Superintendents of Education (formerly Area Superintendents),  
Area Superintendents of Schools (formerly Secondary School District Inspectors),  
Directors of Education and Superintendents of Secondary Schools.

The collection and the analysis of data were performed under the direction of Mr. J. H. Hartlen, Assistant Manager of Operations. The programming was carried out under the direction of Mr. D. W. Urquhart, Assistant Manager of Systems, and Mr. K. R. Frost, Systems Analyst. The report was prepared by Mr. T. David, Statistician.

Shown above are the reasons given by the pupils at the time of retirement. However, limitations exist in the validity of the data since plans of the pupils may have changed or they may have not been able to pursue their plans due to circumstances beyond their control. For example, a pupil may have wanted to go to university but may not have been accepted, or a pupil may have intended to leave Ontario but subsequently changed his mind.

The most significant comparisons of the Pupil Retirement Tables of 1964-65 and 1965-66 are presented in the following pages. The comparative figures appear side by side with diagrams of percentage distributions.

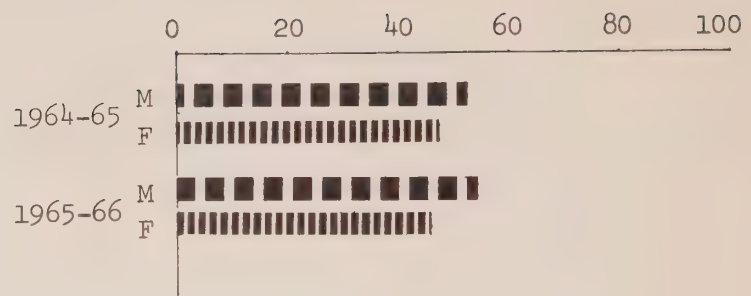

Figure 34

There is an increase in the total number of male and female students who retired in 1965-66 compared to the total number in 1964-65. Looking at the percentages it could readily be seen that the female retirements in 1965-66 show an increase in number at a declining rate. The figures of retirement will, perhaps, be more meaningful if they are compared to the enrolment figures in secondary schools. In 1964-65 the total retirements constituted 24.1 per cent of the total enrolment of 395,301 pupils, and in 1965-66 the retirement was 26.7 per cent of the total enrolment of 418,738. However, as shown under sub-section 2.3, there are striking increases in the numbers and percentages of those receiving Secondary School Honour Graduation Diplomas and Secondary School Graduation Diplomas.

### 2.3 Certificates or Diplomas held by Pupils at the time of Retirement

The tables 2.30 to 2.36 contain details on the number of pupils who held various Certificates or Diplomas at the time of their retirement during the years 1964-65 and 1965-66. The total number of pupils who held the Secondary School Honour Graduation Diploma in 1965-66 represented a 37.1 per cent increase over 1964-65. A larger percentage of male students gained this diploma in 1965-66 than in 1964-65. Secondary School Graduation Diplomas were held by a total of 32,494 pupils in 1965-66 as compared to a total of 26,738 pupils in 1964-65. The combined total of "no certificate" and "certificate not reported" was about the same in both years.

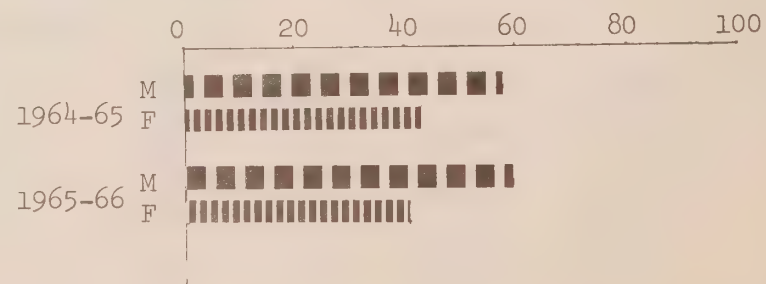

Figure 41

During the two years in consideration the largest segment of pupils who have retired with Honour Graduation Diplomas have done so to continue education in Ontario. Those who retired to enter employment as a total (both male and female) increased by 81.5% on the basis of the 1964-65 total of 1,100 pupils. The number of those who left but who still were not employed was slightly higher in 1965-66 than in the previous year. The number of pupils who left Ontario with Honour Graduation Diplomas increased in number during 1965-66. However, it is interesting to note that pupils belonging to this particular category have maintained a consistency in the low percentages accounted for, both in 1964-65 and 1965-66. Those whose plans are not known have increased both in number and percentage, both male and female, in 1965-66 as compared to the total in 1964-65. An examination of the various categories reveals that the highest percentage of pupils retired to continue education in Ontario, the second highest group to enter employment in Ontario, and that the third highest group consisted of those whose plans were not known.

The most important and basic departure in the trend among pupils holding a Secondary School Graduation Diploma from those holding an Honour Graduation Diploma seems to be that more than half of the former group had retired to enter employment in Ontario.

In 1965-66, of the total number of pupils with Graduation Diplomas, 60.8% retired to enter employment in Ontario, while in 1964-65 the percentage was 59.8. Pupils whose plans were not known had increased in 1965-66. We note that the number of pupils with Secondary School Graduation Diplomas who left Ontario in 1965-66 was less than in the previous year.

The number of pupils who received graduation diplomas increased in 1965-66. The number of pupils who held the Secondary School Honour Graduation Diplomas increased from 17,189 to 23,571, and the number of pupils who held the Secondary School Graduation Diplomas increased from 26,738 to 32,494.

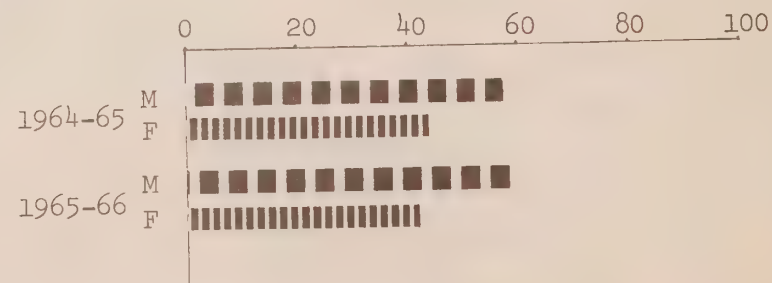

Figure 51

The highest percentage of those who have retired consists of those who have left to enter employment in Ontario. However, the percentage of those who have retired to continue education in Ontario is gradually but definitely increasing and it is not confined to those with Honour Graduation Diplomas. This increase is more marked among male pupils. Students who have retired but whose plans are still unknown account for the third highest percentage of the total retirements. There seems to be more indecision about plans for the future among the boys than among the girls! Pupils who were not employed seem to maintain a consistency in their respective percentages of the total retirements although there were more unemployed in 1965-66 than there were in 1964-65. Those leaving Ontario show a decline in percentage. Retirements due to marriage is more a cause among the female pupils than among the male pupils. There were fewer retirements in 1965-66 due to delinquency than in 1964-65. Those who have not reported any reason for retirement have increased both in number and in percentage in 1965-66 over the previous year.

Finally, we note that the increase in the number of retirements reflects better reporting, increased enrolment, and increased enrolment in and graduation from 4-year programs.

## 6. APPENDICES

## A P P E N D I X I

DEFINITIONS

## CERTIFICATE OF STANDING

A certificate issued to a pupil who completes a Two-year program in one of the branches.

## CERTIFICATE OF TRAINING

A certificate issued to a student who completes a course in the Occupational program.

## GRADE, BRANCH, PROGRAM

refer to the reorganized course of study in Ontario begun in Grade 9 in September, 1962, and in subsequent years in the higher grades in order to "permit...the provision of courses that offer a good general education and are adapted to the requirements of pupils having varied interests, abilities, career plans, and educational objectives". The three branches are Arts and Science, Business and Commerce, Science, Technology and Trades. The word "program" refers to the length in years of a course study within a branch, e.g., 4-year Business course of study within a branch, e.g., 4-year Business and Commerce program.

## OCCUPATIONAL PROGRAM

A special course to "provide education and training that will interest, stimulate, and satisfy the needs of pupils who are 15 years of age or over and have been transferred rather than promoted from Grade 8 to a secondary school".

## ONE YEAR COURSES

refer to one-year courses of study after completing Grade 11 or Grade 12 of any 5-year program, or Grade 12 of a 4-year program. Students completing these courses are awarded the secondary school graduation diploma.

1C - One-year Commercial Course  
 1T - One-year Technical Course  
 1V - One-year Vocational Art Course  
 FT - First year Technology (Ryerson type)\*  
 FB - First year Business (Ryerson type)\*

## REASONS FOR LEAVING

Please see Appendix "Instructions for completion of the Pupil Retirement Form, October 1, 1965 - September 30, 1966."

## RETIRED PUPIL

A secondary school pupil in full-time attendance at a secondary school who ceased to attend that or any other publicly supported secondary school in Ontario for any reason, and at any time from October 1, 1965 to September 30, 1966 inclusive.

## SECONDARY SCHOOL GRADUATION DIPLOMA

A diploma issued by the principal to a student who successfully completes Grade 12 in one of the branches.

## SECONDARY SCHOOL HONOUR GRADUATION DIPLOMA

A diploma issued to a student who successfully completes Grade 13.

## STATEMENT OF STANDING

A statement issued by the principal of a secondary school to a student who completes Grade 9 and 10 or Grade 11 of any 4-year or 5-year program.

\*Satisfactory completion gives entrance to the second year of the applicable course in Ryerson Polytechnical Institute.

INSTRUCTIONS FOR COMPLETION OF THE PUPIL RETIREMENT FORM,  
OCTOBER 1, 1965 - SEPTEMBER 30, 1966

1. What forms do I use?
  - a. Use the green forms for all pupils who cease to attend school at any time from October 1, 1965 to September 30, 1966 (incl.).
2. What is a retirement?
  - a. A retirement is a pupil who ceases to attend a publicly-supported school in Ontario and is not enrolled in one of the following types of Ontario schools - public, Roman Catholic Separate, or secondary.
  - b. A publicly-supported school is a school supported by taxation. The term does not apply to private school or a trade school.
  - c. Transfers are students who leave one publicly-supported school in Ontario to attend another publicly-supported school in Ontario. Transfers are not to be reported on the retirement forms. Transfers will be reported on the Secondary Principal's report.
3. How do I report a student who leaves school and returns to school (i.e., is re-admitted) during the period October 1, 1965 to September 30, 1966?
  - a. Report the date on which the student leaves for the first time on the section of the form "date of first retirement".
  - b. Report the date on which the student is re-admitted on the section of the form "date of re-admission".

(continued)

## APPENDIX III (continued)

- c. Continue to report the dates of retirement and re-admission for as many times as a student leaves and re-enters a school during the period October 1, 1965 to September 30, 1966. (Write "see over", and use the back of the form, if necessary).
  - d. But, be careful to report as re-admissions only those students who left school and were re-admitted during the time October 1, 1965 to September 30, 1966 - i.e., the "date of re-admission" entry on the retirement form does not apply in the case of a student who re-enters after September 30, 1966.
4. How do I account for retirements at my school?
  - a. Read carefully the definitions in 2 (above).
  - b. Complete a form for each retirement on the day that he or she ceases to attend - i.e., any day from October 1, 1965 to and including September 30, 1966.
  - c. Hold the completed forms in a file until September 30, 1966.
  - d. Mail the completed forms for the time October 1, 1965 to September 30, 1966 as soon as possible after September 30, 1966. Keep a record of the number of forms that you mailed. Do not count students who were re-admitted as retirements. Keep a separate record of the number that were re-admitted, and file these at the back of the forms for retirements.
5. Completion of the September, 1966 Secondary Principal's Report and the Retirement Forms.
  - a. Enter the total of retirements for the time October 1, 1965 to September 30, 1966 on the section of the Secondary Principal's Report "total retirements". Do not count re-admissions as retirements.
  - b. Enter the total of re-admissions for the time October 1, 1965 to September 30, 1966 under the section of the Secondary Principal's Report "pupils re-entering after a period of non-attendance at any school".

(The balancing of the total retirement forms against the total of retirements as reported on the Secondary Principal's report is important).
6. How do I complete the forms?

(continued)

## APPENDIX III (continued)

- a. The school name and number appears (handwritten) once on each pad of 100 or 50 forms. Copy this name (a school-stamp may be used) and number on each form that you send to the Education Data Centre.
- b. The name of the student may be printed or written legibly, surname first, followed by two Christian initials.
- c. All dates should be written with two digits for day, month, and year, in that order, e.g., 01 02 45 instead of February 1, 1945.
- d. The dates of retirement and re-admission are explained in section 3 (above). Since most students retire only once, and do not re-enter soon after, the "date of first retirement" will be the only entry necessary on most of your forms.

Example: The entries for a student who retires on October 30, 1965, is re-admitted on January 7, 1966, and retires again on January 30, 1966, and did not re-enter before September 30, 1967 would be:

Date of First Retirement	-	30	10	65
Date of re-admission	-	07	01	66
Date of second retirement	-	30	01	66

(The net result of these movements is to count the student as a retirement).

- e. The section "certificate held at time of retirement" refers to the highest certificate held at the time that the student ceased to attend any school. Elementary school certificates are to be shown as "no certificate or diploma held at the secondary school level". For particulars of Certificates, see Circular HSI "Requirements for Diplomas, Certificates and Statements of standing, 1965-66".
- f. The section "grade in which last registered" refers to the grade or course that the student was enrolled in at the time he or she retired from the school.

Up to three (3) entries on a line may be required to show the particulars of the grade or course in which the student was last enrolled - i.e., circle grade, Branch, and Programme. Or, if enrolled in, e.g., a preparatory class, simply circle PC. (Similarly for other courses).

(continued)

## APPENDIX III (continued)

Examples:

- i. The entry for a student last registered in Grade 12 of a 4-year Arts and Science programme would be:

Grade	Branch	Programme
09   10   11 <b>12</b> 13	<b>A</b> B   S	5 yr. <b>4 yr</b> 2 yr.   1 yr.

- ii. The entry for a 1 yr. Technical Course would be:

1 yr. Technical course **1T** - - - -                      - - - - 1 yr.

Note that only one entry of grade or course will be circled on each retirement form.

- g. Satisfactory completion of the grade in which last registered should be considered as recommendation for promotion, a school Certificate for the grade, or recommendation for external examinations, if applicable. Results in external examination need not be considered in filling out this part of the form, since they are considered in the section Certificate Held At Time of Retirement.
- h. The "reason for retiring" should be checked as only one of the thirty-three (33) items listed.
- i. Occupations within each of the employment classifications are listed on page 4.

Mail completed forms and correspondence to:

Education Data Centre,  
Ontario Department of Education,  
44 Eglinton Avenue West,  
Toronto 12, Ontario  
Telephone Toronto 365-6531

Unless they specifically request the data, please do not mail completed forms to the School Inspector, Director, or Superintendent.

(continued)

## CLASSIFICATION OF OCCUPATIONS

The classifications of occupations used on the Pupil Retirement Form is the one used in the 1951 Census of Canada. Please remember that it is a classification of occupations, not of industries. A person may be engaged in a particular occupation in any one of a number of various industries. The classifications are used only in the section of the Pupil Retirement Form "To Employment In Ontario". If in doubt, write "see over", and write the name of the occupation on the back of the Pupil Retirement Form.

## To Employment In Ontario

- Item 17, Proprietary and Managerial includes those occupations which may be described as owner, manager, or proprietor in any industry or business. The 1951 Census shows most of these were in retail trade (e.g. storekeepers), with a few in manufacturing, wholesale trade, recreation and personal services.
- Item 18, Professional includes accountants, commercial artists, newspaper reporters, journalists, draughtsmen and designers; laboratory technicians, assistants and helpers; R.O.P.
